

e-SMART TRAINING SESSIONS: E-MOBILITY SOLUTIONS IN THE TRANSPORT SECTOR

Presentations of training materials and best practices for electrifying the local public transport and the last mile logistic sector (digital and free of charge)

What are the main challenges of electrifying the local public transport and the last mile logistic sectors? How to effectively implement mobility plans within a regional territory? Which measures can a public authority apply in order to strengthen e-mobility solutions in the transport sector? Which solutions have already been tested? The e-SMART training sessions are dedicated to introduce training materials and best practices, which try to give answers to these and more questions.

Session on training materials (23 February 2022, 11:30 – 13:00 CET, register here)

Session on best practices (1 March 2022, 11:30 – 13:00 CET, register here)
